Looking to level up your kitchen space? Play with color!

To help you bring your kitchen to life, we teamed up with Samsung to show you how their new Bespoke Kitchen Suite can work for your vision. Available at Home Depot, their line comes in 12 trendy hues, two distinct finishes, and is wholly customizable.

Below, we've created six color palettes inspired by the Samsung Bespoke collection to help you visualize your dream kitchen space.

Navy & Pink

Go ahead, swoon a little. These pretty, pink-hued appliance fronts by Samsung soften the mood of the contrasting, commanding navy, creating a look that is both bold and gentle. Grey cabinetry paired with painted, exposed brick adds a textured '50s vibe, while oversized pendant lighting puts the spotlight on tonight's chef. The Bespoke smart fridge comes complete with wi-fi.

Emerald Green, White & Clementine

Rich emerald green, juicy clementine, and a geometric pop of white make a statement in this serene, sage green kitchen. The Samsung Bespoke Refrigerator offers this combo on its 4 door French-door fridge, with the banded white beverage drawer echoing the white subway-tile backsplash. But the fridge is more than just a pretty fixture; it includes Smart features like a Dual Ice Maker, an AutoFill Water Pitcher that keeps chilled, filtered water at the ready, and a Crisper Drawer that allows you to change the temperature to accommodate contents: one temp for meats and cheeses, another for fruits and veggies.

Sunrise Yellow, White & Morning Blue

Samsung Bespoke's Sunrise Yellow glass, paired with both white glass and an icy, Morning Blue, creates a counter-depth focal point in this kitchen. Surrounded by pale yellow cabinetry, a slide-in range (which comes in gas or electric), and over-the-range microwave, the fridge is the star of this show.

Matte Charcoal

This black and grey kitchen is elevated with some earthy, natural elements like a wooden backsplash and hardwood floors. This touch of the great outdoors adds a modern yet modest touch, made even more impressive by the Bespoke suite of appliances by Samsung. They're next-gen, with smart features like an on-the-door digital photo gallery (forget fridge magnets!); the door also serves as a white board, calendar, and to-do list, shows weather and internet, and even features a trivia game!

White Glass & Grey Glass

With white-glass French doors and a grey-glass bottom freezer, the Samsung Bespoke blends into this earthy kitchen with its pale wooden-doored cabinets and mellow '60s aura. With a plain, white-square tiled backsplash and polished cement floors, the natural elements bring focus to the Samsung Bespoke Kitchen appliances, which work seamlessly with this calm gathering space.

Black & White Glass

Nothing is more classic than the black and white motif used to make this kitchen and its centerpiece — the Samsung Bespoke Refrigerator — a haven of calm. The Carrara marble backsplash borrows both shades, creating a serene space for your day to day. Want to turn things up a notch? Having a party? You can turn any and all sections of the Bespoke into a freezer! Even more convenient, the interactive Family Hub Meal Planner software helps you plan meals with the food you already have and create custom grocery lists. With on-door access to both recipes and videos, you can look up recipes, program recipes and grocery lists for future meals, and even send cooking instructions to your Samsung smart oven.

Design a kitchen that feels like you with the Samsung Bespoke Kitchen Suite, available at Home Depot.
